MEMORANDUM FOR THE RECORD

SUBJECT: Task Force for Reorganization

1. At the meeting of 26 April 1973, there was discussion and general agreement on the following points:

A. Chief, A&TS would withdraw his formal memorandum of dissent rather than submit it to the Director of Security.

B. There was an exchange of write-ups, on the organizational structure, with Messrs [REDACTED] and [REDACTED] handling DD/PSI, and Messrs. [REDACTED] handling DD/PTOS. Most items were approved with slight modifications.

E. It was agreed that we would meet the following day for a final wrap-up session before the final report is assembled.

2. Met with [REDACTED] on some aspect of this program on 27 April, and he expressed some concern about a formal dissent. Told him to proceed as he considered appropriate, and the main purpose was to give the Director of Security a complete package and let him make a final decision. He was inclined to go along with the memo on this basis. In the

course of the discussion, he expressed the concern that his replacement is in for a GS-16 and a key point is that one 16 can't logically report to another 16. Again, I expressed the view that he should not cut the slot, and let the Director of Security decide this touchy issue. (The obvious solution would be to have it go to the DD/OS, which resolves many problems.)
